

THE UNIVERSITY of
NEW ORLEANS

UNO TRANSPORTATION INSTITUTE

MASTER OF SCIENCE IN TRANSPORTATION PROFESSIONAL PROGRAM

All students in the MS in Transportation program enjoy the benefits of in state tuition.

The Louisiana Board of Regents approved **Master of Science in Transportation (M.S.)** degree at the University of New Orleans is the first degree of its kind in the state. The program, which launched in the fall semester of 2015, is one of the first in the United States to train students in multimodal freight and passenger transportation systems.

- The MS in Transportation is designed for **traditional students and working professionals** seeking career advancement or a specialized career in transportation planning or administration. It is offered in a **hybrid format** that provides students with the flexibility of an online program and the benefits of concentrated on-campus meetings that allow students to build a professional network with classmates, instructors and industry-affiliated partners.
- The program is housed in the **UNO Transportation Institute (UNOTI)**, a federally-designated University Transportation Center which engages in applied research.

CAREER OPPORTUNITIES

Graduate degree holders who majored in transportation sciences earn \$94,000 annually with the top 25% of graduates earning more than \$120,000 annually.* Career opportunities include:

- Transportation planning
- Transportation administration
- Freight forwarding
- Port management
- Public transit operations
- Supply chain management
- International trade

* Georgetown University Center on Education and the Workforce Analysis of U.S. Census Bureau, American Community Survey micro data, 2009-2013

CURRICULUM

The program is 33 credits, including an 18 hour credit core. Students choose among one of three specializations: transportation planning, transportation administration, or a self-directed concentration, which may include a thesis option. Students also complete a six-credit capstone.

PROGRAM OBJECTIVE

To provide multimodal education and workforce development opportunities to transportation industry professionals so they might create the most technically advanced, secure, efficient, accessible, competitive, dynamic and environmentally responsible systems for moving goods and people.

Suggested Two-Year Curriculum Map

Year 1

Fall:

- TRNS 6061: Introduction to Transportation Planning
- TRNS 6020: Intermodal Freight Transportation

Spring

- TRNS 6200: Transportation Policy and Administration
- TRNS 6100: Environment and Energy

Summer

- TRNS 6901: Capstone I

Year 2

Fall

- TRNS 6010: Transportation Seminar
- TRNS 6902: Capstone II

Spring

- TRNS 6300: Applied Techniques for Transportation Professionals
- Elective

Summer

- Elective
